Zona 4 de Mixco, Guatemala • andrsrxn.com • +502 5422 7582 • info@andrsrxn.com

Designer and Web Developer. More than 2 years of experience as a Freelancer.

Specialized in modern branding and Full Stack web development with a focus on UI/UX.

I turn ideas into unique projects through creativity, technology, and strategy.

FEATURED PROJECTS

Zentro

Full Stack Next.js & Hono with Node.js Development

May 2025

- Designed and developed a modern, high-performance notes application, implementing an interactive Drag and Drop interface based on *fractional indexing*, optimistic mutations for real-time feedback, keyboard shortcuts for enhanced productivity, and strict accessibility standards.
- Built a scalable monorepo architecture (Turborepo) with TypeScript, modularizing the ecosystem into distinct apps and packages. Integrated Next.js on the frontend, a fully-typed backend with Hono RPC, managing PostgreSQL with Drizzle ORM, ensuring code quality by achieving 99% type coverage and comprehensive unit testing with Vitest.

The Choice

UI/UX Design & Web Development Case Study

February 2025

- Designed the digital product strategy (website) for a Korean restaurant in Guatemala, including wireframes and an optimized sitemap focused on user experience, prioritizing key user flows such as table reservations and menu navigation.
- Translated the design into code using Next.js to build a dynamic, efficient, and visually engaging website, optimized for SEO, AA and AAA accessibility standards, highly customizable and adaptable to any reservation platform via API integration.

Grupo ATProy

Brand Refresh & Web Development

February 2025

- Enhanced the company's visual identity while maintaining its existing strategy, reflecting quality and high standards, and expanding its reach through digital channels.
- Developed a static website with Astro to clearly present services and past projects, while providing an effective contact channel to attract new clients.

Iglesia La Presencia del Señor Jesús

Branding, Web Development & Social Media Content

August 2025

- Created a complete branding system from scratch, developing a cohesive visual identity aligned with the organization's core message across its main communication channels.
- Built a bilingual (English/Spanish) blog-style website with Astro, designed to centralize key information, serve as a scheduling tool, provide service details, and offer access to relevant Bible studies in a single platform.
