

Carlos Andrés Raxón Castañeda

Zona 4 de Mixco, Guatemala • andrsrxn.com • github.com/andrsrxn/icons • info@andrsrxn.com

Full Stack Developer and Designer. More than 2 years of experience as a Freelancer.

Specialized in Typescript and React to build modern web apps with a focus on UI/UX.

I turn ideas into unique projects through creativity, technology, and strategy.

FEATURED PROJECTS

andrsrxn/icons

NPM Package Engineering, Turborepo, Typescript 7, React 19

July 2026

- Designed and built a tree-shakable React icon library with 1,000+ duotone UI icons and 250+ flag icons, constructed from real strokes and shapes for per-icon animation control, including a logical RTL-aware system with opt-in directional variants and dedicated RTL-exclusive icons.
- Architected a Turborepo monorepo with an automated release pipeline using Changesets for semantic versioning, npm Trusted Publishing (OIDC) for token-less, provenance-verified publishing, and GitHub Actions for CI/CD across linting, type checking, and testing, gated by branch protection rules.
- Built a Next.js documentation platform featuring a searchable icon catalog with category, tag, and name-based filtering synced to URL state, intercepting-route modals for icon detail views, live SVG customization with copy/download, and example pages demonstrating real-world component usage.

Zentro

Full Stack Next.js & Hono with Node.js Development

May 2026

- Designed and developed a modern, high-performance notes application, implementing an interactive Drag and Drop interface based on *fractional indexing*, optimistic mutations for real-time feedback, keyboard shortcuts for enhanced productivity, and strict accessibility standards.
- Built a scalable monorepo architecture (Turborepo) with TypeScript, modularizing the ecosystem into distinct apps and packages. Integrated Next.js on the frontend, a fully-typed backend with Hono RPC, managing PostgreSQL with Drizzle ORM, ensuring code quality by achieving 99% type coverage and comprehensive unit testing with Vitest.

The Choice

UI/UX Design & Web Development Case Study

February 2026

- Designed the digital product strategy (website) for a Korean restaurant in Guatemala, including wireframes and an optimized sitemap focused on user experience, prioritizing key user flows such as table reservations and menu navigation.
- Translated the design into code using Next.js to build a dynamic, efficient, and visually engaging website, optimized for SEO, AA and AAA accessibility standards, highly customizable and adaptable to any reservation platform via API integration.

Iglesia La Presencia del Señor Jesús

Branding, Web Development & Social Media Content

August 2025

- Created a complete branding system from scratch, developing a cohesive visual identity aligned with the organization's core message across its main communication channels.
- Built a bilingual (English/Spanish) blog-style website with Astro, designed to centralize key information, serve as a scheduling tool, provide service details, and offer access to relevant Bible studies in a single platform.

EDUCATION

Colegio Bautista Shalom

High School Diploma in Computer Science

Guatemala City

2017-2018

Universidad Mariano Gálvez

Business Administration — All Coursework Completed

Guatemala City

2019-2023

Technical Training & Specialization

Frontend & Backend Web Development, Databases, Testing, Infrastructure, Cybersecurity

Independent Education

2020-2024

Technical Training & Specialization

Branding, Print & Digital Design, UI/UX Design

Independent Education

2021-2023

ADDITIONAL SKILLS

- Native Spanish speaker. Fluent in English (C1 Proficiency).
- Strong critical and creative thinking, excellent communication and writing skills, effective time and resource management.
- Advanced knowledge on:
 - o **Web development:**
 - Git y Github, GitHub Actions (CI/CD Pipelines, Workflows)
 - Typescript/Javascript, Node.js/Bun, Next.js/React, Hono/Hono RPC, Tailwind, Storybook, Monorepos
 - Package Engineering, NPM Publishing, Semantic Versioning (Changesets), OIDC/Trusted Publishing
 - MySQL, PostgreSQL, MongoDB, Redis
 - Responsive Design, Mobile First, and RTL (Right-to-Left) Support
 - Accessibility (A11Y) — AA & AAA standards
 - SEO optimization
 - CDN, caching, cloud infrastructure & storage
 - Visual Studio Code/Antigravity/Cursor
 - Microsoft Office Suite
 - IA: Claude, ChatGPT, Gemini, Kling AI, Higgsfield, others
 - Scalable and reusable Component Libraries
 - o **Design:**
 - Adobe Illustrator, Photoshop, After Effects, Premiere Pro, InDesign
 - Figma, wireframing, UI/UX design, prototyping
 - Professional video editing (VFX & SFX)
 - Motion graphics (animation)
 - Copywriting
 - Brand guidelines
 - Design systems
